

# QUIK-FIT™ STALL KIT

## PERFECT FIT FOR THE PERFECT STALL

Our Quick-Fit™ Stall Mats are constructed of high quality FLEXGARD® rubber. These mats provide comfortable non-slip flooring, while reducing back and leg strains that can lead to animal injuries. These mats have a textured Punter™ top. The bottom is wide-ribbed construction which gives the mat a much more stable surface and is excellent for drainage.

Quick-Fit™ Stall Mats are the best way to offer your animals a healthy, natural environment. They insulate against cold and damp conditions and absorb shock. Quickfit™ Stall Mats can reduce your cleaning and bedding costs too, while saving you time and effort. This mat is the most durable, longest lasting, and most economical solution for your stall flooring needs.
