

CourtEdge™ Reducers

CourtEdge™ Reducer Site Applications

- ▲ Slip resistant, durable & safe
- ▲ Pre-assembled & dry-fitted prior to shipping
- ▲ Easily & quickly installed
- ▲ No load weight limitations
- ▲ Available in six colors with our exclusive StoneCap™ coating
- ▲ 100% recycled rubber, made in the USA
- ▲ Assures access code compliance
- ▲ Interior & exterior applications

CourtEdge™

REDUCERS

PROBLEM:

New sport floors are often placed on top of existing floors, or a more robust floor is installed, creating vertical barriers. This gymnasium had a new basketball court installed which created a 2-1/2" rise around the whole court, which made it non-compliant, not to mention dangerous.

SOLUTION:

SafePath's Reducer 1200's (2-1/2" high) were wrapped around the court, eliminating the barrier, creating a gradual rise and making it ADA compliant and ready to use!

"The world's largest selection of recycled rubber transitions; each project is hand crafted and custom cut to fit."

CourtEdge™ Reducer Applications

SCHOOLS & PARKS

Reducers surround a synthetic turf installed on top of an asphalt playground to create a football field.

GYMNASIUMS

Reducers are used in doorways and to surround new and old flooring for compliance and accessibility.

STADIUMS

Reducers are used to surround the fields, at doorways and other areas removing vertical barriers.
